## WORK EXPERIENCE

### Owner

Jun 2021 - present

Raduenz Tecnologia - Brazil

Partnership with Avenue Code for development of technology projects and technical consultancy for their clients.

- Back end engineering in the e-commerce of Brazil's largest relationship network in the civil construction market.

### Full Stack Developer

Mar 2021 - Jun 2021

Freelance - Trulogic Tecnologia da Informação - Brazil

- Development of new features on a microservices-architected web application using .NET, C#, JavaScript (Node.js) and Vue.js;
- Writing unit tests for the implemented features;
- Designing database schema changes in order to support new features.

### Software Developer

Nov 2014 - Jul 2020

Quick Soft Tecnologia da Informação - Blumenau, SC, Brazil

- Developed, tested and improved modern web applications and REST services using .NET Core and Vue.js;
- Maintained and developed new features on legacy applications using .NET Framework, Web Forms with AJAX and SOAP services;
- Designed features in newer projects, including data modeling and API design;
- Developed background services both for Windows and Linux;
- Taught and oriented junior developers.

### Intern

Nov 2013 - Oct 2014

Quick Soft Tecnologia da Informação - Blumenau, SC, Brazil

- An internship program in the company during my high school, where I learned better to write code in big applications and the company's software development process.
